

## ***Frequently Asked Questions***

**Title: Moving to new machine - Which drivers should I use**

**Date: August 2017**

**Card/Board/Module: 4000PCI[e] series**

**Operating System: Windows**

### **Question:**

I am moving my Excalibur card(s) and application(s) to a new machine, different operating system. Which drivers should I use ?

For example, move from Windows XP (32bit) to Windows 10 (64bit).

### **Answer:**

Please see our FAQ titled “Driver Support for Various Windows Operating Systems - 64bit Windows and running a 32bit EXE”, at URL <http://www.mil-1553.com/faqs>.

This document spells out the necessary changes for the hardware driver (at the Device Manager level), and for the software drivers.
