Frequently Asked Questions

Title: ExcConfig - DEBUG error
Date: Aug 2017
Card/Board/Module: n/a
Operating System: 64bit Windows

Question:

I am trying to run ExcConfig, the Excalibur Configuration Utility.
It throws an error "Failed to get data for 'DEBUG'".
What does this mean ?
Where can I get a working version ?

Answer:

This bug appeared in version 4.1 of this utility, when running under 64bit Windows. It was fixed in the next version, 4.2.

You can download the current version of this utility (currently 4.8) from our website at URL http://www.mil-1553.com/applications .
