Frequently Asked Questions

Title: Website - Where can I find the files ?
Date: May 2015, Jan 2020
Card/Board/Module: all
Operating System: all

Question:

Where can I find the current software drivers for my Excalibur card(s) and module(s) ?

Answer:

Please visit our website (home page) at www.mil-1553.com.

At the top right of the Excalibur homepage, click on Login. Once you register and log in, you can download (for free) any of the software package files, manuals, data sheets, etc. available on our website.

On the homepage, near the top of the page, there are a number of buttons.
- Click on the "Downloads" button.
- Click on the selection which best matches the card that you have (e.g., EXC-4000 Family" if you have a 4000 card with M4K series modules).
- Click on the module name that matches the module for which you need the current software release.

The webpage now displays a list of available packages for this module, including software manual, hardware manual, software tools for Windows (32bits), software tools for Windows 64bits, PCI hardware installation for Windows (different flavors), and other software packages that are available for this module.

On all pages for the 4000 family cards & modules, the files are arranged in six categories: All, Windows, Linux, Resources (manuals, GUI applications), LabVIEW & LabWindows, legacy & Other OS.
